Fill my heart with song, and let me sing forevermore. You are all I long for, all I worship and adore. In other words, please be true. In other words, I love you. Wow! I've seen it from Roger Köppel's video and thought it was a weird cast. But I'm really looking forward to it. If the 7 has to cover the biggest hit by Roger Köppel, Moscow, Moscow, no, no, no, no, no, no, no. Anyway, here's the original. These are comedy men. Let's go. Comedie Männer, presented by Emi Kaffelate. This is Comedie Männer episode number 370. Today we're talking about popular parliamentarians, cold showers and cool cats. My name is Stefan Busser, with me are Aaron Herz and Michael Schweitzer. Hello, Salih. Yes, you're welcome. I have to go to bed. Yes, that's what I expected. Last week, I told you a lot about the photos of my feet in our online shop. There were a lot of people there. And there were pictures of my feet. And now I promised to solve the high-level problem. And that's why I have to go to bed now. Tomorrow I have a appointment. Nice. I'm very happy to go to bed. I'm Peter. Let's go to bed. Let's go to bed. That's weird. You know him. Yes. Isn't it weird if you... He doesn't do that. He doesn't do that. He doesn't know where to get it. He only lets you go to bed. How do I know? And then you don't go to bed?

I don't always go to bed. No, no. And then I take my foot bath. And then I go home. And then we do it in the office. Nice high-level problems. Weird moment. When you go home and you know, okay, now I have to take the picture. I'm not doing that. I promised to solve the high-level problem. Our house photographer, Tiziaan, he will have to do this. And take the pictures. In our bookkeeping. And under which post will this be carried out? In the working hours. Yes. You have to think of something. I have a question. You say you have the most beautiful feet in the world. Fine feet. Fine feet. Fine feet. Fine feet. Why do you have to go to bed? Because I really have people who have actually paid 50 francs. 50 francs? For three high-level pictures. Wow. I just want to... Three times the same. You have different angles. Different angles. And I just want to offer the best possible experience. Or at some point in the process, maybe in the middle of the week or so, I will send it to you. You can also rent it for your home. What else did you do? For 50 francs. I could also buy 25C socks for that. But if you want to invest in my feet, it's better to invest in Switzerland.

one thing and the other is, I was really happy, Stefan, you were there. Yes. Last week we won a prize. Yes. Now not the comedy award, right? No. Not the Swiss podcast award. No. It's the first next week. Next next week. Yes. Now we are also nominated. No, we won. I have to read it. We won. The sponsoring award. The sponsoring excellence award. Yes. If you want a surprise prize, together with Emmie. Yes, yes. Because Emmie is our partner in that sense, on the podcast with the comedy man. We are for the idea and how to implement it and so on and so forth. We were awarded. With this beautiful prize, I have a camera. Sponsoring Switzerland. Sponsoring Switzerland. Sponsoring Switzerland. And we were really happy. You were a great neighbor. Yes, great. We were there with the... But unfortunately you didn't have any. Unfortunately you didn't have any. Unfortunately you didn't. I have to say, Emmie also sent the best people that she even had in this company. And us, right?

Yes. And then they were military and took the prize. We are still proud of the money from Emmie that she sent. Yes. The money is... The money is too expensive. Too expensive. So it is. Just give us the prize. No, no. At first, I can tell you again, Emmie is just the best. Yes, yes. You really have to say that. They have waited for something and have now been rewarded with this prize. They have also been rewarded with this prize. They are very happy to have invested in us. Not just in our podcast, but in general. It is a cruise business and people enjoy consuming it. And we can only do that because we have a strong partner like Emmie. Exactly. I give you the prize, Stefan. from behind, in our studio. In the meantime, I can also tell you how it is going. Yes, it's not going so well. I trust you. What do we say? Since three years, I trust a common patient. Yes. Yes.

It is a very hard work. And this patient is, Namely, is my website. Oh. she has a website. I have a website. People say, we are young, you should make a website so that we know what you have done as such. You know what, you have worked there, you have already done that. You write for this, vou have to collect something on a daily basis. And now it's like this. that I have become more independent, more independent, more independent, more independent, more independent will work, more independent advertising, who has something, I like to write, for any task, and for that I have to make a website. Now, I have really already been a website since long time, but she has not vet written on it. I have been always at Basteley, so I sat down before her. And then a bit like a fly simulator, I have always done

something like that again and waited again. Yes, yes, now I have to, now I have to tell you Do you want to increase the pressure? That's what I'm doing, because now I've told you. That means that my websites should do it now. I hope I can increase the pressure. I believe in that pressure. You can go and see Arno Merz.ch. Do you let yourself build yourself? Do you build yourself? I didn't build myself. A colleague of mine had an agency that built websites. And it took me a long time to build them. And he had a few things to do with me. But not as much as I thought. Then he said, yes, let's talk about it later. I've always wondered about the people who build their own websites. For example, Jimdo. That's a funny name. Who came up with the idea to offer Wix.com? Someone who doesn't speak German. Someone who probably doesn't speak German. You can build your own websites at Wix.com. I was also impressed. Wix.com I didn't have one. And then nothing. That's your website. Yes, a lot of Wix. How are you? We had the premiere of the comedy club in Das Zelt. Last week, on Wednesday, in Lachen, a beautiful place, right by the lake. There are 16 or 18 proposals throughout the year.

Together with Claudia Zuckolini, Charles and Guela, Nico Ahren came up with the idea. I was able to carry out the project and try out some new comedy material. And I set up a new record. I'm very proud. I set up a new record. It didn't last for a minute. That was the first one out of the hall. Wow! I never did that. The following situation. I came out and we played in Lachen, Canton, Switzerland. And after that, I started a small random evening in Portugal. Because if you want to make a voice, vou need to lock your ears. Three or four jokes, I started to lock my ears in the corner of Switzerland and noticed that it was a little quiet in the front left. And I thought, well, I see that someone is standing up here. I'm going to go to the wrong place. I didn't know where to sit. I played again, two or three jokes and locked my ears. And I noticed that it was really quiet. And then I turned around and there was his wife standing up. Then I started walking out. And you noticed that the whole hall was suddenly too quiet. So I couldn't ignore it. And so quickly I had to react and say, look, the first one is already going. So. Big brother in the hall, Applaus. I thought, okay, it's not

that I can get all the other nerves because they just kept the whole thing. Then they ran out and I thought, well, maybe they noticed that I was at the wrong front, or no idea. I didn't realize what was really going on. I just finished playing. The train comes to the stage, then I see from backstage how they walk in and sit down. Okay, well, in this case they didn't drink anything or no idea what they were doing. Nothing happened to the rest of the show. They laughed, they took the show. I also stood up two times, all the others stood up. At the end, they were standing behind the stage and talked to Charlie. Backstage? They were just backstage. And I was just a little bit dressed up. You know, in any case I thought, maybe they heard about the organization. I went out and said, whatever, I didn't do anything. They stood up and I said, okay, they weren't that happy when they put their shoes on. And I was like, how can we put our shoes on? And they said, yes, the problem is the queue. The queue was free. The queue was free? Yes, the queue was clear. They had such a difficult time as a substitute because of the pandemic. And then I come

and make jokes about the queue. They just took it out of the queue. Really? Yes. They tell Charles and Gwela, who is dark, how difficult it is. I would never have thought that. It's true. It's so difficult. You can't think of it. Or they say, yes, you say it's nice. I mean, I'm just going to say it. They were quite happy when they knew that I was coming. They just said something. They will say if there is something because of the queue or if there is something in the queue, they will just say it's nice. The only queue that was free was in the queue. It was really cool. It's a new record. It was out of the queue but unfortunately, they looked at the rest of my show. It's only two. Yes, it's only two. It was really bad. I didn't expect it. But well, if we don't play in Kanto and Zürich, jokes with the queue won't be a big problem. And the funny thing is, I lived with friends in Kanto and Switzerland. I was still drinking and then they said it's a funny number with these two. And they said what with these two? But they already said that.

They said it was already said. Maybe they want to go home because they are afraid that if they come home they will have to live somewhere else because we have so little space. So we are ready for the first topic of the week. The living room is close to Switzerland. The reason is that it is relatively less built. At the same time, the population grows. But out of the living room it doesn't even have the barrel. It's free. Yes. that's true. But the situation is really complicated. For my part, I already have a family of people who don't have it at home. But anyway, we should talk about it. The problem is that if you want to build more, you need more people to build. So far, it's a bit of a problem. Yes, I don't have it. It's not better to build for you. If you have a tight room on top of each other, then you also have a lot of space and a lot of plants. Again? It's really a problem. The living room is close to Switzerland. We don't disappear. Now you just have to use the rooms you have. Now there won't be a room alone. Now you always have to go to the room. You have to get it out. You can also live in a quiet room. Yes, ves. You can save money. In the office space, the business space, it's a problem. There are many companies

where you only have one office. And Paul is not only talking about traffic, but also about housing. One of the tenants who lives here is Baschi. He's been living here for years. Greetings. Greetings. I'm not sure. The population is already growing. But in my case, especially G. I'm not quite sure. That's my understanding. Michael, that's my understanding. Do you normally go to G? Yes, yes. We can get out of here. Your apartment is gone again. But the whole discussion, you always have the feeling that there will be more people. The problem is demographic. There will be more and more old people. Basically, Europe is dying. That's true. Children's numbers are decreasing. There will be more and more old people. And we have to bring people into the middle of migration. Where they live and live. Where they live and live. It's about care. If there are more and more old people, where we have to take care of them, they have to go to the doctor. Everything is fine. The old people are growing. Not the young people. There are a lot of young people. There are a lot of lost countries. There are certain parties that want to bring. Yes, you need it.

It's really a different style. Since I can remember, it means, we will always be more. Since I went to school, since I read the newspaper and now suddenly we have too few houses. Yes, it's like a sign. It's like a climate change. Okay, it's coming now. It's hot in December. That's typical for the people. And it's also typical for politics. Where you can deal with this problem from a legislature, and not from the ones who are elected. The next four years, it's like, it doesn't surprise me. No, it doesn't surprise me. It's the dream of my own home, of the little house in Neumet, with the greenery around. It's the sign. There are a lot of neighbourhoods where old people live in big houses. In this house, because it's always cheaper than to rent a house. But it's not right in this house. You could place everything in the family. You have to say, we need this house. You live on one floor. You can rent it, and if you're 60 years old, you can find it. Now you're 80 years old. You can rent it, but it's not the house where one or two people live in. It's the big house.

Of course. It doesn't bring anything. They want to change something. They're in Bern. We're talking about the order of the president of the parliament. The house is 22°C. The population is going to save energy. Welcome to the Swiss Heizgenosse Chance. 22°C in parliament? Are you wearing your T-shirt? Did you just take a bath? I have another question. Who's the boss now? Gandinas. It brings a bit of a retromani. Next door. I didn't have the time when I read it. Look at that old man. He was a bit early. Imagine, you had to do the crazy hard job and you decided to rent it on the red button. Yes. It's a lot harder than being on the street or something like that. I think it's okay to say to people that they're 2°C. You could have told Charlie how hard it was. Discrimination is pure. Temperature has been applied to the order of the president of the parliament Brigitte Hepperli-Coller. She didn't do much.

It's okay. It's okay. Now let's do it. Brigitte Hepperli-Coller. She said, I'm Brigitte. You're Brigitte. A little reminder. Brigitte Hepperli-Coller was the one who had to evacuate the last federal house where there was a hole. I think she just wants to stay in the federal house and stay in the federal house. She's a little bit awake. She's a little bit agitated. We're talking about the small and the big rooms and the bio and the crytose. What are you doing? I'm the bio-sum. Exclusive, only 24 hours. You're talking about when you still have old women in the parliament. You're just looking at them. You're saying I was so cold. You're telling me what you want. You really want to tell me that now you're always like this. I can do it. Now you're never going to do it. I just want to say that. Honestly, none of us had a living on 19 degrees in the last few months, right? Short-lived. Really? Yes, in the middle phase when you were still a little sick then I thought let's take a look. It was a quick pass.

It was nice. Yes, of course. The only thing I noticed is that it's always good to get rid of the light and the stuff you should actually do. I've never been on 19 degrees. You can put in each room individually. I know it works. I'll show you. The heating is regulated. It's just a hoax. It doesn't work. It's just something like this. It doesn't work. There are two levels. It's just the signal that works. All of them say they do whatever they want. They drink water and what do I know? It just makes the people feel massive. Absolutely. But I think if the federal government had a solar cell on the roof then the heating wouldn't be more sustainable. Speaking of sustainability, let's go to Kanton Zug. There are the most expensive and newest cars on the street. In the segment there are more than 30% more expensive than in the rest of Switzerland. In Kanton Zug. The people in Zug don't take the car but you take the car for example in Lötzberg.

I think it's really interesting that rich people drive big, new cars. That's really for me now. Thanks to AXA for their studies. They found something that would be worth knowing. And now I know where my premiums are going. The important studies. You know the reason that in Zug everything is a little better. Zug is actually a Swiss maxiature. Especially what all the other Kantons have they have a better version. But that's the reason. That men in Zug have a smaller swan. That's a f\*\*k. You said a swan. With the same car you are in Zurich with an auto-poser and in Zug you have a average family family. That's a joke. For all the children. Zug lives on big Fuss. He lives on beautiful Fuss. Fine Fuss. Fine Fuss. But where do you park all your big cars? I don't know. You have to park somewhere. I don't know. It's not surprising. I remember last week that in Zug or in Switzerland maybe in Switzerland

the cars are a little bigger. But you look up and think if we had the money we would have a better car. Without studies I can tell you that the apartments are a little expensive in the Kantons. I don't think so. That doesn't have to be studies. Is that so? Thanks. Axa. Then we go to the border where I am also on the way only with a half-naked leg because in Germany the urns have to be handed over in Switzerland. Because here in our country the law is clearly liberal. With the cremation the Germans know each other already. Historically. Absolutely. It's a success. But it doesn't take long for these lives to come. Do you have to send your dead gum to hell? Really? Of course we love your Germans. Greetings. Greetings. It's going to help. The question I want to ask is do these urns are the best place to reserve with the urns? I'll put my urn in the shadow of a nice place. What bothers me is that they get cremated and then the urns are sent to Switzerland and then they are somehow destroyed.

I think that has also a dangerous component. Imagine you are walking on a nice day in the mountains and it's windy you have to be careful because on a windy day you suddenly get a headache. That's why I say we have to defend ourselves. We have to start at the border with the ventilators so that we don't blow back the tests. You say 5-5-5-40 will be re-posted. No. We really take everything from the Germans. Gold, medicine, ashes, that we don't really have. Yes, absolutely. It's about the costs that you can afford in Germany. It costs a little more. And to save the cremation costs German people don't start cremating the urns in the mountains. Just a little bit. Have you ever known that loud axes have the most expensive and biggest urns? No. Do you want to be cremated? Yes. No. No. It's enough if you don't cut it. If you want to be cremated, I would say. The principle is a hot tip. No. If you want to be cremated

you have to say what you don't want is a crab. You don't want a crab? No, I don't want a crab. Where do I go next? You could go to a garden where you can learn how to learn and then you can eat there. I have to say, these are your feet. Yes, my feet. They are not so fine. I would recommend you to put them at the bottom of a jar. I don't think we can do that. I don't think so. Is it the same at this moment? Yes. It's more for those who stay there. That you have something. We don't go to Mallorca to spend the summer there. I don't know. I think it's a crab. Can you imagine not to think about it? I think it's very good. You have already lived there for 20 years. I just don't think about it. But you have to do something. No, nothing. Why? What do you mean? And then you're done. And then you're done. And then you're done. You don't think about it. I say yes. I have to do something. Yes, you do. What do you want to do with it? I don't want to. No! Nothing will happen. Why should something special happen to us? Because our brain is a little better. Yes, that's... Do you think there's some kind of energy going on? I don't know. We don't have to think about it. You can imagine not to think about it. It comes from an interesting point. Next topic. We have one nice topic to talk about. Let's go deeper. I think we have a totally more important topic. I'm looking forward to all of you. We're coming to this topic. You have to believe in Jesus Christ. He takes you with him. No, that won't happen. I'm pretty sure that it won't happen. But I'm not so sure if you just don't think about it. We can follow it all the way. It's going to be really exciting. I think we can do more philosophical episodes. Philosophical Friday. Yes, we can do that. Philosophical. Yes, we can do that. Philosophical Friday. Philosophical Friday. It's a nice idea. You can buy it at SRF with women. Another successful statement from the Federal House. Look, the mass theme is still there. But this is really something from Dampos and Binderwerld. Finally, a cheap parliament. More value of 7.7% to 2.5%. Dampos is actually another account of the hygienic article. Yes, it's a small hole in the pocket because more will go down.

But as a result the Swiss export more weapons so that we can still earn more money with blood. It's really exciting. There were people in parliament who thought, no, it has to be a luxury article. Or from Dampos and Binderwerld. What would happen? Maybe men would start to instruct. Yes, yes, yes. 5.2% or are they? Yes, 5.2% less cost for women. That's about the gender pay gap. We're free now. We're free now. I really don't need it anymore. I'm really waiting for that idea. Every time there's an argument about the workplace I'm going to do the workplace. I don't have anything to do with it. I'm the only person who knows many men. Oh, okay. How do we define it? There's a definition. What do we do? Save children's trust? Save the picture? Yes, yes. What we do with my Dampo and Binderwerld is worthless. It's a good neighborhood. It's beautiful. Would you like to go to my Dampo and Binderwerld? No idea. But if it's so cheap

I'll build a Dampo. I'll build a Dampo. It's important that the parliament has no big Dampo and that it was built and that it's important and that it's good. It's also a problem for me. So we can call it completely independent? Yes, it's completely independent. It's not like it's bought only by women. It makes no sense at all. It makes no sense at all. By the end you don't need an article that's okay. It's completely absurd. It's completely absurd. It's been used for months. No, I don't do it because it's free. It's like toilet paper. You can't just use more money for a luxury article. It's used for periods. Yes, after a bit. Absolutely. It's completely independent. And sometimes I was really scared when you followed it. I think it was an FTP or something like that. Maybe you could trace it on 2.5%. You could also use it for flowers. It's a racial free will. It's not a period. It's an FTP.

It's interesting. It's interesting. It's interesting. It's interesting. It's expensive. It's a huge piece of paper. It's a huge piece of paper. It deserves someone like Tom and Dämlich. I don't like it. It's even more expensive for women than for men. It's absurd. It's absurd. I've had it for a long time as a woman. It's cheaper. And who's guilty? Malou. My favorite message from the last week. There are cows in the house. Jagdseer. All of them are supposed to live in the heart of the Basel. On the account of one single enemy. Namely M.B.N.Gal-Kathen-Malu. And again it's a white-haired cat. M.B.N.Gal-Kathen-Malu. Does he belong to Mabu-Chaka? Of course. I love Mabu-Chaka. I've been watching Abo-Chaka-Docs on Spiegel TV for 14 hours a day. I was surprised when I went back to watch it. If you're interested in this, I recommend the Ruse YouTube channel. Ruse is a Twitcher and YouTuber who especially commented

on the German rap scene. And if there was an attack. Abo-Chaka was against Bushido. Every podcast is followed by Bushido. And he always commented on the Ruse channel. R-O-O-Z. M.B.N.Gal-Kathen-Malu. That's one thing. He sends other cats on the line. That's the wild animal in the neighborhood. I wonder why they know what's going on. They run away like this. He says, Bingo-Kathen-Malu. Tell everyone. Say my name. Say my name. Bingo-Kathen-Malu. Yeah, bitch. The most interesting thing is that he didn't see anyone besides Ben-Gal-Kathen-Malu. That's nothing. Bingo-Kathen-Malu. Maybe he didn't know what's going on. If I was in the Bingo-Kathen-Malu, I would have a tail. Maybe it's wonderful. Ben-Gal-Kathen-Malu. Ben-Gal-Kathen-Malu. If we were to give you the news. My face is very scary. You see, your face is very cute.

You don't tell anyone. You never say anything. We also had a terrorist, Nero. He terrified the whole area. He was in the middle of the street and he wasn't gone. When the car stopped, the cars had to go around him. He terrified the whole area until we had two marines. There was a marine in the middle of the street. The marines had to go around him. He was in panic. Everything was done until the car stopped. But the marines didn't go. And now everyone in the car had to go around him. It was very funny. Who could it be? The Muck. The Muck. The Muck was black. Nero wasn't white. The Muck was a legend. Everything was done in the car. He had blind lines. fish, birds, everything at home. Fish? I don't know. I want a clarion. No, not a clarion. From the pond. We didn't know that there were two kilometers to go. We still visited the old neighborhoods. The whole area of the village

was destroyed. But there are stories that they still find at home. Who is the Bundesrat? The Coller. He found one at home. He found it at Bernzügel. It was at Bernzügel. And Katz from Bern went to the cellar. Maybe it smells. I think so. But a nice story. The Muck was just a neighbor to the Mendevom. Two houses away. The Muck was really Katz. Katz was so weird. Did you have a lot of animals? Dogs and Katz. We had a dog. Not like Foxy. A golden retriever. What did he take? A fairy. He had a cat named Blum. He was Dutch. He had a kiss. A kiss. The best cat ever. The neighbor was a wimp. When I was a child I sat on the chair. I looked down. I didn't cut the chair. Ijust knitted. I knitted on the floor. Thank you. You're welcome. I didn't get on the chair. You can't get on the chair.

Then I came from behind. When I went down from the sock I really went in with my collar. You really looked up. You were such a bitch, Katz. He was right under my car. It's weird. No, he wasn't. He was on the ground. He was behind the front tire. He wanted to go through. He took the second wheel behind the left tire. Did you see it? No. Muck became a rock. We also had Jöckel. Jöckel was a black cat. He was very proud. He was always on the balcony. He never had any animals. He needed Jöckel. We had a dog. Julie. We had a dog called Cindy. She was a stupid animal. She was really... You know, when you come to the family you always have this animal. It always fits you very well. Cindy was really perfect. She was like... She said, Michael, this is your dog. She wasn't the sweetest dog. She always liked to hunt dogs. She was a good dog. A mixling. What was it? An apple cellar? It was really difficult. We had a small heart. Mimi. We had Mimi.

We had more of them. I don't know how they were. We had a rabbit. On the second day I let the rabbit go. We were lucky enough to find it. But it was done quickly. Let's talk about Zebra Finkli. Zebra Finkli. Zebra Finkli. Zebra Finkli. Zebra Finkli. How did you find the rabbit? Zebra had a moustache on her belly. She was like... She was very nice. She was very nice. Well, the three rabbits from the service are back next week. The YouTube comments are coming up next week. We can't miss them. Coming up next week. YouTube comments are coming up next week. What's the name of the X-Act? 1977. It's written for the ALGO and the heart. The ALGO wasn't one of our pets. It was the ALGO Rhythmus. It's important. At least three hearts back. At least three hearts back to X-Act 1907. There's a new name. But you can leave a comment. How important is that? It helps us a lot. Also at home. Use that sound. And subscribe to the podcast. That's something that's important. If you leave it on the Spotify, Apple, Google, where, always. Give it a quick subscribe. Or leave a comment. If you liked it too. You can say that. What you can use most is the ComedyMänner shop.

ComedyMänner.com.ca. Not only for you. It's not like that. It's the impression that you have only foot prints. No, of course not. There's the nice pulleys and t-shirts. Everything's nice. Biobahn, the first quality. And it's fun to wear it. I personally don't like it. But I do. Do that. Actually I say it at home too. When you put your foot prints on it. ComedyMänner.com. If you want that from Michael. No, don't listen to him. It's actually on YouTube. I think I never subscribed to the channel. Is the bell the subscriber of the channel? No, that's the bell. When you click on subscribe, you have subscribed. The name says it. The bell gives you a notification. When a new episode is coming. And if you have subscribed, it doesn't happen. Not automatically. So just click on everything you can do there. In our channel. That was Bummer TV for this week. Have a good time. See you next week. Goodbye. That was Bummer TV.
