Acast powers the world's best podcast.

Here's a show that we recommend.

Welcome to Everybody in the Pool, the podcast that dives deep into the climate crisis and comes up with solutions that work.

I'm Molly Wood.

With this show, I'm excited to bring you conversations with startup innovators, business leaders, policymakers, and everyday people doing their best to solve the biggest challenge of our time.

We're trying to make hydrogen commercial aviation a near-term reality.

If you eat a vegan diet, you reduce your green gas emissions by 75% with every meal.

The whole reason why I started Nest was because of climate change.

Join me every week for inspiring stories, practical advice, and a healthy dose of optimism.

So come on in.

The water's fine.

Acast helps creators launch, grow, and monetize their podcasts everywhere.

More than two weeks after the attack on Hamas against Israel and when the Israeli bombardments multiplied and intensified on Gaza, a new open war could be declared with the Liban to the north.

Indeed, several exchanges of shots between Israel and the Liban have been claimed these last few days.

But then, what could happen?

Why is the situation so critical?

Hello, I hope you're doing well.

We're going together for a new dive into the news in ten minutes.

So we're going to talk about the absolutely catastrophic humanitarian situation in Gaza.

We're also going to talk about the rest of the news, but first we'll start with this subject, the fear of an additional war.

Indeed, as soon as the attack of the 7th of October against Israel, the Israeli-Hazard ally Hamas has claimed several shots against Israel, which has then reposted.

So the Israeli-Hazard, which we've already talked about these last few days, is therefore a Lebanese-Islamist political party, but it is also a terrorist organization, according to the European Union, and many countries today.

So the U.S.-Bola, which has an important influence in the Liban, has therefore been supported by Hamas and has been witnessing, every day since, a rise in violence at the border between the Liban and Israel, to the north of Israel.

The U.S.-Bola has claimed shots of rockets and shells, but also attempts to infiltrate on the Israeli territory, while Israel has been reposted by artillery bombs, guns, or even air raids aimed at the positions of the U.S.-Bola.

We have the first figures since the 7th of October, 29 people were killed by the Liban side, mainly soldiers from the U.S.-Bola, but also civilians, including a journalist from the Press Reuters Agency, Israeli side, four people were killed, including three soldiers.

[Transcript] Les actus du jour - Hugo Décrypte / Risque d'une guerre Israël-Liban, aide humanitaire à Gaza, inondations en Guadeloupe... Actus du jour

So, in front of this rise in tension, the Prime Minister, Israeli Benjamin Netanyahu, declared this Sunday that the U.S.-Bola would make the mistake of his life if he entered your war against Israel, because Israel, and I always quote him, will strike with an unimaginable power and which will be devastating for the state of the Liban.

He also said that this will make them regret, I quote, the Second War of the Liban.

This war broke out in the summer of 2006 between Israel and the U.S.-Bola.

It had led 33 days to the death of more than 1,200 people on the Lebanese side and 160 on the Israeli side.

So, is there a risk that a real war is triggered between Israel and the U.S.-Bola in the Liban?

Well, this Saturday, the No. 2 of the U.S.-Bola has put Israel in a position, I quote, that according to events, if it appears that an event proclaims an intervention on their part, well, they will do it.

And this event in question has to be estimated, but some believe that the terrestrial invasion of the Palestinian territory of Gaza by the Israeli army could be an important cap.

We can also note that Israel had announced on Friday the evacuation of Kiryat Mona, which is an Israeli city close to the Lebanese border where about 25,000 people live.

And this Sunday, the Israeli government announced the evacuation of 14 additional collectivities in the area, while many inhabitants had already fled.

Moreover, the Israeli army deployed many reservists, soldiers who were recalled by the army in the north of the country, at the border with Lebanon.

We observe quite similar movements from the Lebanese side, several thousands of civilians have already fled the areas at the border with Israel to escape more to the north of Lebanon.

And the U.S.-Bola deployed several tens of thousands of people at the border.

By the way, it should be noted that the U.S.-Bola is much more powerful, according to some than the Hamas.

It has, according to some specialists, much more weapons and a very important army of several tens of thousands of soldiers.

Anyway, rise up the tensions, these last few days, but once we have said that, well, no massive attack, let's say, took place in this area as it could have been in the past, and it could have been due to several reasons.

So the first potential reason is that the U.S.-Bola is largely supported by Iran today.

So it would therefore be necessary, priori that it is the agreement of Iran to intervene, except by attacking Israel, well, the U.S.-Bola to considerably weaken itself, while today it is a real asset for Iran, which is an enemy sworn by Israel.

In other words, there could be discussions between the U.S.-Bola and Iran on the fact of really attacking Israel, and this attack could potentially be risky.

Another reason that we can note, the U.S.-Bola could be criticized by a part of the Lebanese population in case of attacks on Israel.

One of the advanced elements is, in particular, the economic situation of the country, which has been at the lowest since many years.

So I send you back to our daily activities on the subject.

[Transcript] Les actus du jour - Hugo Décrypte / Risque d'une guerre Israël-Liban, aide humanitaire à Gaza, inondations en Guadeloupe... Actus du jour

We had, by the way, been reporting to the Lebanon.

A few years ago, we had already underlined the catastrophic economic conditions and a state on the edge of the faillite in Lebanon.

Some therefore believe that training Lebanon in this war with Israel could have very important consequences and negative consequences from an economic point of view for the country.

So there are these internal debates in Lebanon, and then largely, in fact, according to Cimachine, who is responsible for the Iran program at the National Institute of Security Studies and which is interviewed by the newspaper Le Monde.

In reality, the U.S.-Bola does not necessarily want to really attack Israel.

One of the objectives would be to keep the Israeli army occupied at the border with Lebanon to, I quote, do everything they can to prevent the Israelis from invading Gaza.

In other words, potentially no massive attacks from the U.S.-Bola, but regular strikes to maintain a presence of the Israeli army at the border with Lebanon and try to slow an invasion of Gaza by the Israeli army.

In short, in any case, you would have to be very careful about the situation in Lebanon and Israel. You will also have to follow the statements of the Iranians, the Jewish enemies of Israel and support not very hidden from Hamas or from the U.S.-Bola.

We will also follow the situation in Syria or Yemen.

I will put the links directly in the description to answer more.

So before moving on to the news, I also wanted to make a point about the humanitarian situation in the Gaza strip, a catastrophic situation according to the Organization of the United Nations and which, day after day, the Palestinian territory controlled by Hamas has been placed in a complete siege by Israel.

So we have already talked about numerous reprisals in today's news, but concretely, the 2.4 million inhabitants have almost no more water, no more electricity, no more gas, in short, no more essential elements to live.

At the same time, Israel continues to lead important bombardments, bombardments that touch Hamas buildings, but also buildings where civilians are located. According to the Organization of the United Nations, which has several agencies in Gaza, hospitals are submerged in injuries and children, I quote, die in an alarming rhythm. According to the figures transmitted by Hamas, more than 5,000 deaths are counted.

A precise and hard to verify figure in the current state of things, but which is in the sense of statements from NGOs, journalists and UN on site.

It is estimated that the human balance is very important and that it only makes them say day after day.

So this weekend, 34 trucks of humanitarian aid have arrived in Gaza from the border with Egypt, a number that is not enough according to the UN,

because it will take about 100 trucks of humanitarian aid a day to come to help the inhabitants.

This Sunday, the American president Joe Biden and the first Israeli minister Benjamin Netanyahu have announced that the Gaza strip will benefit, I quote, of a continued humanitarian aid, while a third one that we see is coming this Monday.

We will see what it is.

[Transcript] Les actus du jour - Hugo Décrypte / Risque d'une guerre Israël-Liban, aide humanitaire à Gaza, inondations en Guadeloupe... Actus du jour

On the other hand, the Israeli army always accuses Hamas to use civilians as human shields. The army also announced wanting to increase its bombardments and air strikes and announced this morning to have led limited terrestrial operations in the Gaza strip. And this, while the Israeli army seems to prepare a terrestrial invasion of a large number in Gaza, to note finally the latest information that Emmanuel Macron is expected in Israel this Tuesday. He will meet the Israeli Prime Minister Benjamin Netanyahu, while 30 French people have died in Hamas's attacks and that 7 have always been missing. Moreover, several demonstrations to demand the arrest of Israeli military operations in Gaza took place these last days in Europe.

This was the case, for example, this Sunday in Paris, a demonstration that gathered nearly 15,000 people according to the police, 30,000 according to the organizers.

It happened globally in the calm.

In short, we will follow the evolution of the situation, whether it is here, in podcast audio, or then on Instagram.

I leave you with Blanche for the news, in short, and I'll come back right after.

Thank you Hugo and hello everyone.

We start with a first subject.

Guadeloupe has been affected by many floods this Sunday, a few hours after the passage of the hurricane Tammy on the island.

The French Department of Outremer had been confined and placed in alert Violette this weekend, be the highest alert level.

So there was no victim, but the hurricane caused heavy material damage.

The Minister of Education in charge of the Outremer, Philippe Vigier, is expected this Monday to take place.

Second act, the ZAD, so the area to defend opponents to the construction project of the highway A69,

was evacuated this Sunday by the forces of the order.

We have already talked about this highway aimed at linking Toulouse to Castres, but it is very criticized by environmental activists, the climate judge.

And so this Saturday, a demonstration took place to protest against this project, which ended up at the construction of the ZAD near the site.

So it is an illegal occupation in space.

Several dozen anti-immigrant policemen were mobilized this Sunday to evacuate the area.

And in total, nine people were involved and six members of the forces of the order were slightly injured.

On his side, Gérald Armanin, the Minister of the Interior, congratulated the forces of the order for the reprise of this zone to defend, while denouncing an unnecessary violence during the operation.

Several videos of the intervention have circulated quite well on social networks this weekend.

We see the forces of the order in charge of the protesters.

Third act, the aggratee mission nature, which aims to finance actions in favor of biodiversity,

[Transcript] Les actus du jour - Hugo Décrypte / Risque d'une guerre Israël-Liban, aide humanitaire à Gaza, inondations en Guadeloupe... Actus du jour

and launched from Monday by the government.

In fact, it is a ticket that costs 3 euros,

and on these 3 euros, 43 cents are returned to the French office of biodiversity, so public establishment in charge of protection and restoration of nature.

However, this aggregate game is criticized because it has been judged too addictive for the young by the regulator of the game, the national authority of the games,

it is also criticized by certain associations

who estimate that this project will generate hundreds of thousands of tickets in a plastic box, which is therefore all except for ecology.

Fourth act, several drugs against the rum, such as the Humex, the Actifed or the Renateville,

could be dangerous for health,

according to the national security agency of the medicine.

In fact, it has compressed, would increase the risk of AVC,

which is a disease related to the obstruction of blood vessels.

The cause is the Pseudo-Ephedrine, a molecule present in the compressed, which restricts the size of blood vessels that can cause AVC risks.

The risk is very low, but it exists,

whatever the dose and the duration of the treatment.

A European Union investigation is currently in progress,

which could potentially lead to the ban on these drugs,

while the NSM has asked the pharmacists to remove and compress the premises.

Last act, here in 2025,

restaurants in France will be forced to indicate on their menu

if the dishes are not homemade.

This is what was announced by Olivier Grégoire,

the Minister in charge of the PME and commerce,

in an interview to the Sunday's Tribune Journal.

It should concern the 175,000 restaurants in France.

In any case, since 2014,

there is indeed the mention homemade,

accompanied by a logo,

which can be added to the restaurant's menu,

which elaborates places on places,

but it is facultative and very little used.

This is the end of today's news summary.

Obviously, don't forget to subscribe to not miss the next one,

be it the application you use to listen to me.

Also, visit YouTube or Instagram

for other exclusive news content.

You know the name of the accounts, it's Hugo Descriptes.

Listen, I think I said everything, take care.

And I'm Detective Dan.

If you love True Crime,
but haven't yet listened to Small Town Dicks,
then join us on Friday, September 22nd,
as we premiere season 13.
I'm pretty sure you will discover your new favorite addiction.
The news was honest.
They're talking, could there be a serial killer on the loose?
Her last moments of life,
nobody should have ever experienced.
I hear something that absolutely stopped me cold.
And I get chills just thinking about it,
because you realize life and death is here.
The new season of Small Town Dicks is out right now.
It's real crime for True Crime fans.
